Q. Find out minimum 5 bugs in any application ?

Application link :- <https://tree.taiga.io/>

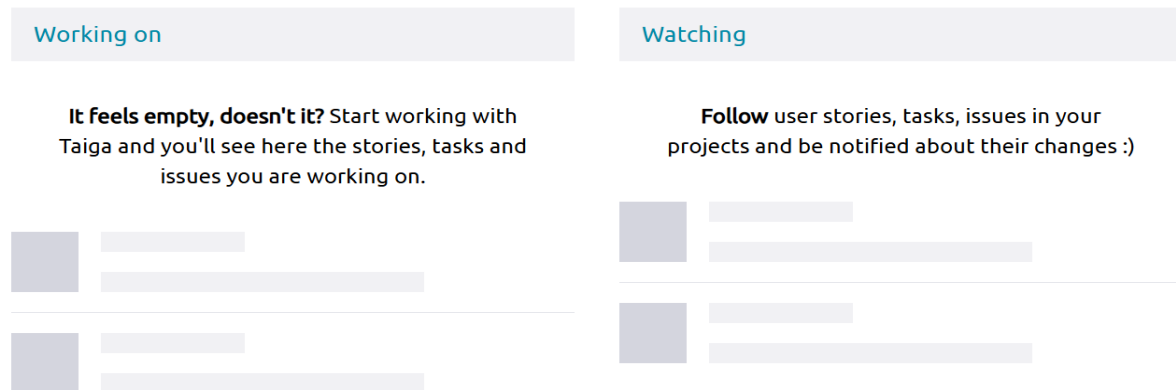

About : Taiga is a free and open-source agile project management platform designed for cross-functional teams that use Scrum, Kanban, or a combination of both methodologies. It is aimed at software developers, product teams, designers, startups, and organizations that want a simple yet powerful way to manage projects.

Bugs :

- Dashboard Not Properly managed.
- Improper Input Displayed in Project Search Results.
- Application Language Changes Automatically Without User Action.
- Project Import Process Takes Excessive Time to Complete.
- Layout Not Displayed Correctly Across Different Screen Sizes.
